

WebAdMIT: The More You Know

Hello colleagues,

In this edition of *The More You Know: WebAdMIT Edition*, we are focusing on the **WebAdMIT API (Application Programming Interface)**.

BACKGROUND

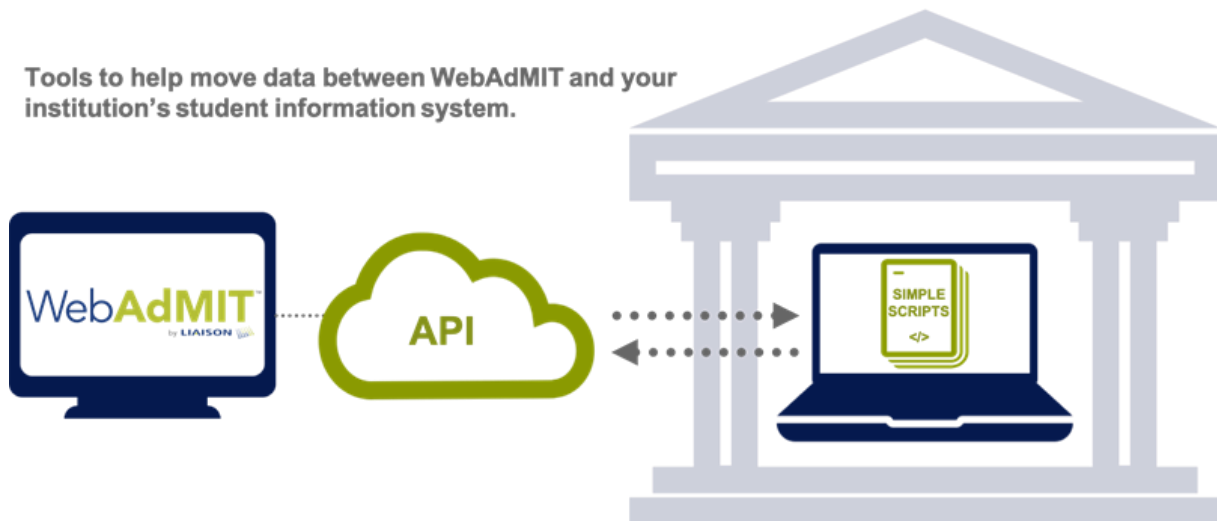

As an admissions user, you may need to integrate the applicant data coming from WebAdMIT with your institution's SIS/ERP system. To make this process easier for you, you can use the WebAdMIT API to automate this data transfer.

Liaison's WebAdMIT API allows users to automate admissions tasks. For example, you can use the Export API to extract applicant data from WebAdMIT for analysis, processing, or other integration with on-campus systems.

To effectively use the WebAdMIT API, you'll need to:

1. Identify **what** data you need (i.e., what applicants and what application data).
2. Define **where** you need to send it.
3. Determine **how** often you need to send it.

Tools to help move data between WebAdMIT and your institution's student information system.

LEARN MORE

As you and your institution consider using the WebAdMIT API, the following resources may help you and your colleagues better understand the process:

- [Click here](#) if you're an admissions user and are considering using the WebAdMIT API.
- [Click here](#) if you're an IT analyst and working with the WebAdMIT API to assist your admissions team.
- [Click here](#) if you're a developer and need programming assistance or documentation.
